

SUSTAINABLE DEVELOPMENT CHARTER

We recognize that our business has an impact on the environment, the economy and society.

In line with the ISO 20121 standard, we have drawn up our sustainable development charter.

Our commitments, both internally and externally, are:

- Select our suppliers and service providers with rigor: we wish to collaborate with players who care about the environment and share the same values as our company.
- Avoid unnecessary printing and give preference to digital formats.
- Opt for local caterers who use seasonal produce.
- Give preference to local service providers to limit the impact of transport and participate in the regional economy.
- Set up selective waste sorting.
- Avoid wastage or offer surplus food management.
- Minimize carbon footprint.
 - By using clean vehicles
 - Favoring locations accessible by public transport
 - By favoring virtual exchanges
 - Offsetting our carbon footprint, particularly air travel, through climate contribution actions (Good Planet Foundation).

This charter is a tool for continuous improvement towards an eco-responsible approach and eco-designed events, aimed at minimizing our carbon footprint, promoting social responsibility and fostering economic sustainability.
